

For nearly three decades, Waterline Industries has been recognized as one of New England's premier General Contractors. Specializing in the construction of wastewater and water treatment facilities, when the Waterline name is attached to a project, clients are assured that our employees will carry out the company mission of quality and professionalism for the duration of the job. We are proud of our ability to self-perform all phases of our projects and as such, are currently accepting resumes for the following positions:

**Laborers, carpenters, electricians, and mechanical personnel**

The responsibilities include day-to-day tasks associated with working on wastewater and water treatment construction projects. You should have at least five years in the construction industry, (preferably in wastewater and water treatment facilities construction) for the above trades. Daily activities for our labor crew may include grout and concrete formwork, cleanup, excavation, assisting in layout, material handling and storage, assisting the superintendents, and other tasks as assigned. Our Electricians will have experience with rigid conduit, benders and threading equipment, power and control wiring, knowledge of instrumentation and SCADA systems, knowledge of commercial generators and transfer switches, PV Systems knowledge a plus.

A valid, current OSHA-10 card is required.

Waterline offers a competitive wage and comprehensive benefits package including health, dental, paid life and disability, and 401k pension plan.

Waterline is an equal opportunity employer that values diversity at all levels. We are a performance-focused company that is committed to hiring individuals who positively reflect the company's mission of excellence, innovation, and integrity regardless of personal characteristic, backgrounds, or cultures. All candidates who are qualified for any of the above positions are encouraged to apply.
